Operating Guide

Bark Control Collar

As a high-tech pet product, The Bark Control Collar aims to help you effectively and humanely train the dog. This product specially designed for stopping stubborn and constant barking. The Bark Control Collar is monitored by a micro-processor that distinguishes the target dog's bark from its surrounding noises, including barks from other dogs. When the target dog barks, this product automatically generates a static stimulus to warn the dog stop barking which progressively increases as bark continue. Through conditioned reflex, it discourages the dog from barking. Experimental result proved that this is a quicker, less painful and more humane anti-bark product.

Specification

Length: 80MM Height: 30MM Width: 40MM

Weight: 90G Power: 3.8V Lithium Battery

Adjustable Nylon Strap for neck size: 20-50CM

Function

Center the **Flexible Probes** underneath the dog's neck, touching the skin. When the vibration of the dog's bark triggers the Vibration Sensor and activates the Sound Activated Sensor, a static stimulus is administered through the Bark Control Collar to warn the dog stop barking. It progressively increases to 10 levels if the dog keeps barking. If the barking continues, this product will automatically shut off for 3 minutes and will reset itself to the 1st "warning" mode to ensure the dog is being trained gradually without getting hurt. Dogs won't break the barking habit overnight. When the dog forgets the static stimulus and barks again, the Bark Control Collar will remind it with a weak static stimulus.

Feature

- The static stimulus time is short (less than 5ms) Only work effective on dog's

skins and will not harm the dog

- Effectively and quickly stop the dog's inappropriate barking
- 10 levels of static stimulus. Through conditioned reflex it discourages the dog from barking
- Unique, patented Flexible Probes. Ensure it has a good contact with the dog's skin. No need to trim the dog's hair.
- Vibration Transmitter has automatic shut off or reset feature for power saving
- 100% Water proof. Water-resistant

Battery Module

This Product utilizes rechargeable Lithium battery. Battery charger included.

The battery last 40 days after fully charged. (Based on 10 hours used per day)

Operating Guide

Figure (1)

- Press the **“On/Off”** Button. If the Indicator Light is Solid Red, the battery is low and need charge. Turn power off when charging. Charging time is about 1 hour. The battery is fully charged when the Indicator Light turn

green.

Figure (2)

- Attach the Collar with the Bark Control onto the dog properly as shown in figure (2), Adjust it to fit the dog's neck and cut off the excess length. This package includes an Adjustable Nylon Collar for Soft Collar lovers.

- Centered the Flexible Probes underneath your dog's neck touching the skin as shown in figure (3), Make sure both probes are in good contact with your dog's skin. If necessary, trim the hair under your dog's neck where the probes contact the skin.

Figure (3)

- Examine the Flexible Probes, when they are shortened 1mm, indicate the probes are in good contact with the dog's skin (Do not attach the collar too tight as it will make the pet uncomfortable)
- After Press the “On/Off” button, the Light flashes **Green** 2 times. Then goes **Red** 2 times. And when Solid **Green** light is on, indicates the system is ready.
- Through conditioned reflex, it discourages the dogs from barking.
- Prepare the dog some snack food as a reward for its good behavior.
- Press “On/Off” button again. The **Green** LED turn off, indicates the system power off.

To Test the Bark Control Collar

Use the Test Light. Open the Bark Control Collar. Fit the Test Light to the Flexible Probes as shown in figure (4). Then touches the Vibration Sensor by hand and shouts. The Test Light will flash to show that it is functioning

properly. The Test Light is designed for figure (4) testing purpose only and not belonged to the Bark Control Collar. Remove it after testing.

Important Caution:

- **Not for use with aggressive dogs.** Do not use this product if the dog is aggressive. Aggressive dogs can cause severe injury to their owner and others. If you are unsure whether this product is appropriate for the dog, please consult your veterinarian or certified trainer.
- The Bark Control Collar is not omnipotent. It is only a tool for dog stopping bark. The dog won't break barking habit overnight. It requires owner's patience for the long term training.
- Do not leave the dog alone the first few times it wears the Bark Control Collar.
- Some Dogs may be scared and scream out at first couple days when they wear the Bark Control Collar and warned by the static stimulus. If this happens, reassure the dog with comfort or dog snack food. After several repetitions, the dog will understand the function of the Bark Control Collar and will not bark inappropriately. If small minority of dogs still continues barking, remove its collar until it calm down and relax. It takes time for it to get used to the Collar.
- The dog will reduce barking after a couple days that it wear the Bark Control Collar. But the training process is still not complete. Smarter dog will attempts to bark. Please keep placing the Bark Control Collar on the dog in every situation when you expect it to be quiet. If the dog is not wear the Bark Control Collar, it may resume barking and its learning will suffer a setback.
- Avoid leaving the Bark Control Collar on the dog for more than 10 hours per day. When possible reposition the collar on the pet's neck every 2 hours.
- Never connect a lead to the Bark Control Collar. It will cause excessive pressure on the probes.

- Examine the dog's neck daily for signs of a pressure sore. If a pressure sore is found, discontinue use of the collar until the skin healed.
- Though this product has been designed to distinguish the dog barking from surrounding external noises, but the micro-processor still activate by other vibration and sounds occasionally. Therefore, turn it off when it is not in use.
- This Bark Control is designed to be water-resistant. It is okay to let the dog wear it in the rain, but be sure to remove it before bathing the pet or allowing it to swim.
- This device is comprised of plastic and electronic parts, if the dog swallows any part of the device, take it to the local veterinarian clinic.
- This Bark Control Collar is not a toy. Use it only for its bark stopping purpose. Keep it away from the reach of children.

Frequently Asked Questions

- Q: Will another dog's bark activate the dog's Bark Control?
A: No
