

Preface

We visited the conditions for pets feeding in many cities, and found that there always is a problem for many masters ——— “Dogs’ barking at midnight”. The barking affects the masters’ rest and brings the unnecessary troubles for other people. After our investigation, above 75% of the people who do not feed dogs are affected by barking. Therefore, we developed the scientific, light & impact, environment-friendly and humanized, automatic bark-distinguishing mist-spray barking-stop device, without harm to dogs.

1. Precautions

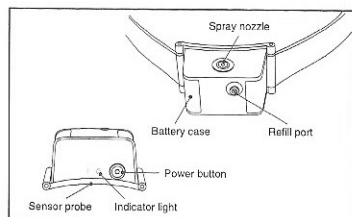

Note	<ol style="list-style-type: none"> 1.The product is suitable for big-sized, middle-sized and small-sized dogs. 2.The product shall not be used on human body, otherwise it will violate the local laws 3.Before you play with dogs, please turn it off or take it off 4.Do not make dogs wear the barking-stop device for a long time
Warning	<ol style="list-style-type: none"> 1.Do not let it be a toy for children 2.It is forbidden to disassemble it by yourselves 3.It is forbidden to place barking-stop device and natural lemon mist liquid tank adjacent to furnaces or high-temperature positions 4.The manufacturer is not responsible for direct or indirect losses caused by improper usages

2. Parts

Mist-spray barking-stop device
Natural lemon mist tank
Battery (specification 4LR44)
20-inch adjustable nylon strap
User's manual

3. Function of each

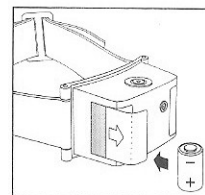

Indicator light: to indicate normal work
Battery case: install battery (+) and (-) properly
Power button: power ON/OFF
Refill port: refill liquid
Spray nozzle: it will spray mist when dogs are barking
Sensor probe: sensing reception system

4. Guide for use and

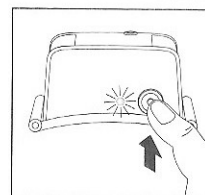

Installation:

Take the product out of the package, open battery case, install battery (+) and (-) properly, and then close the battery case (Please turn off or take the battery out if you will not use it for a long time)

Battery's service life:

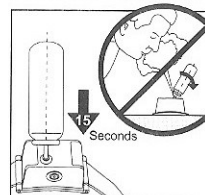

1. The average service life is 2-4 months, according to the actual situations.
2. The service life of the first battery will be comparatively short when it is used on a dog for the first time.

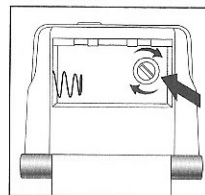

Turn-on: push power button for 2s, then the green light will flash once, to start the controller program. (The green light flashes once in an interval for 5s, in normal conditions)

Turn-off: push power button for 2s, the green light will flash continuously, to turn off the controller.

Refill mist liquid: when mist liquid is in a shortage, the yellow light will flash continuously for warning. Before you refill, you shall turn it off, and turn on again after refilling.

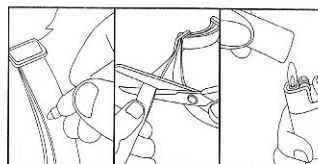

Precautions on gas injection: to inject natural lemon-flavor gas, aim the natural-flavor gas can to the gas injection needle vertically and fix, it shall be finished in 2 times, push the gas can into the needle, then move after 5s, push for 10s for the second time.

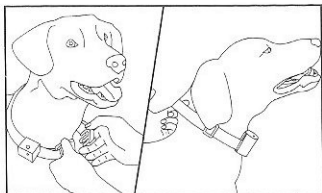

Adjust gas amount: adjust gas amount (the initial spraying amount already is adjusted to the normal, users shall not change randomly).

Put the barking-stop device onto dogs:

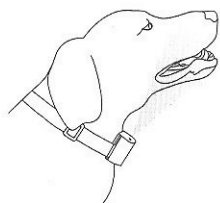

Adjust neck strap according the size of the dog's neck, cut off the excess of the neck strap, and trim by lighter.

User's Manual

The proper wearing shall be done for effective use. Put it onto the dog's neck and install, aim the spray nozzle vertically to the dog's nose, with a clearance width for a finger between it and the dog's neck. Then it can distinguish the dog's barking frequency. The installation is quite important, too loosening will lead to the abnormal performance of the product.

For dogs with long furs, you shall trim the furs on the path for spraying, to ensure that the mist will reach the whole effective range.

5. Functions and effect

1. Intelligent ---- mist-spray barking-stop device can effectively make pets stop barking, the barking vibration frequency will trigger its sensing reception system, and then it will spray the natural lemon-fragrance mist for warning, to make dogs stop barking. (mist has no harm and side-effect for humans and pets, with natural environment-friendly lemon fragrance)
2. When the green indicator light flashes once in an interval for 5s, the controller works normally. When the yellow indicator light flashes continuously, you shall refill the mist liquid.
3. The energy consumption is low, the average service life of the battery is 2-4 months, according to the actual situations; The service life of the first battery will be comparatively short when it is used on a dog for the first time.(You can buy battery in all supermarkets.)
4. The lemon fragrance mist is made of purely natural lemon essential oil, without CFC ingredients, as an environment-friendly product, without harm to humans and dogs. (each bottle, 85g, 3 oz)
5. It can automatically distinguish barking, without interferences from outside sounds and frequencies.
6. It will be effective soon after dogs' wearing, no long-time training is needed.
7. It is small, with a great capacity for mist liquid, 25 times is ok for spraying after being fully refilled, 1.5 times of other brands.
8. For most dogs with it properly installed, it works when dogs are barking, and dogs will stop barking, then masters shall praise the dogs. After adaption for a short time, the dogs will memorize the warning.
9. For a minority of dogs, they will be likely to become angry or uneasy. Then masters shall guide gently to make the dogs adapt. After a short-time training, they will adapt soon.

6. Important hints

1. The product is suitable for big-sized, middle-sized and small-sized dogs, and shall not be used for any other purposes outside of the description in this manual;

User's Manual

2. A long-term wearing on dogs will lead to the skin problem similar to Cotton-padded mattress scar, which is an oppressive skin necrosis, therefore you shall refer to the following methods:
 - ① Often check whether there are skin eruptions or pains on the dog's neck;
 - ② Please monitor your dog after you put it onto your dog within 1-2 days;
 - ③ Regularly check and avoid extraordinary great pressure, with a clearance width for a finger between it and the dog's neck;
 - ④ Every week wash the dog's neck and the sensor probe.
3. Do not try to disassemble or fix any component or part, otherwise, the warranty will be invalid;
4. If your dog has extreme revolts or dangerous reactions against it, and the guide is not effective, please stop using it immediately;
5. We suggest that the product shall be used for the dogs above 6-month age and 8-pound weight.
6. The device shall not be used for 12 hours continuously within 24 hours.

7. Malfunctions

It does not work	Ensure that the battery is installed properly
	Replace battery
	Refill lemon mist liquid
	Check whether the spray nozzle is jammed
No reaction from dogs	If it cannot spray, please contact with the local dealer for solution
	Tighten again, to ensure that the sensing reception system touches the dog's neck skin tightly
	Check and ensure that the spray nozzle aimed at the dog's nose exactly
	Ensure the dog's fur will not affect spraying effect

8. Technical parameters

JBPW-05 is driven by alkaline 4LR44 battery (DC6V)

Mist-spray barking-stop device

- ① Power supply: DC4.5V-6V
- ② Standby status current: 240uA
- ③ Flash light (flashes in an interval for 5s) current: 1mA
- ④ Current in spraying: 100mA
- ⑤ The battery's normal life: 2-4 months

Warning:

- 1、The manual is checked carefully before printing, our company has the right to explain for any mistakes in printing or misunderstanding.
- 2、We will not notify for any technical changes in future.
- 3、The appearance and color shall be in accordance with the actual product.
