

PET651 New Anti Bark Collar User's Manual Product Manual

Please Read this Manual Carefully Before Use

1

Important Note:

This collar has three 3 functions please ensure that you use the correct function and that you have it set up correctly before you put the collar on your dog and again after the collar is attached.

Green Light Sound Only
Blue Light Sound and Vibration
Red Light Sound and Static Shock

Introduction:

This collar does not work off the sound of your dogs bark but from air movement from your dogs throat. Therefore the fitting of the collar is VITAL if the collar is to work correctly...

When the collar is fitted correctly IT DOES NOT MOVE... You can slide just one finger under the collar. If it is NOT FITTED CORRECTLY it will go off randomly and NOT Work when your dog barks...

2

What The Bark Collar Actually does when Your Dog Barks

When it is in GREEN LIGHT Mode.

On the 1st Bark 1.5 Sec Beep
2nd Bark within 40 secs 2.5 Sec Beep
3rd Bark within 40 secs 4 Sec Beep
4th Bark within 40 secs 4 Sec Beep
5th Bark within 40 secs 4 Sec Beep
6th Bark within 40 secs 4 Sec Beep
7th Bark within 40 secs 4 Sec Beep

The collar will now enter sleep mode for 1 minute
If your dog does not bark within the 40 sec limit then the collar will revert back to number 1

When it is in BLUE LIGHT Mode.

On the 1st Bark 1.5 Sec Beep
2nd Bark within 40 secs 2.5 Sec Beep
3rd Bark within 40 secs 4 Sec Beep 0.5 sec vibration
4th Bark within 40 secs 4 Sec Beep 1 sec vibration
5th Bark within 40 secs 4 Sec Beep 3 sec vibration

4

6th Bark within 40 secs 4 Sec Beep 3 sec vibration
7th Bark within 40 secs 4 Sec Beep 5 sec vibration
The collar will now enter sleep mode for 1 minute
If your dog does not bark within the 40 sec limit then the collar will revert back to number 1

When it is in RED LIGHT Mode

On the 1st Bark 1.5 Sec Beep
2nd Bark within 40 secs 2.5 Sec Beep
3rd Bark within 40 secs 4 Sec Beep 1 small shock
4th Bark within 40 secs 4 Sec Beep 2 small shocks
5th Bark within 40 secs 4 Sec Beep 3 small shocks
6th Bark within 40 secs 4 Sec Beep 4 small shocks
7th Bark within 40 secs 4 Sec Beep 5 small shocks

The collar will now enter sleep mode for 1 minute
If your dog does not bark within the 40 sec limit then the collar will revert back to number 1. The use of the warning tone followed by increasingly intense tones and vibration or static shock stimuli sets up a pattern that your dog will quickly learn is caused by its own barking. It takes time

5

to break bad habits.

When your dog forgets and barks again, the warning tone reminds your pet without immediately applying any stimulus. At each step, your dog gets to choose whether it's worth the increasing discomfort to bark again. We have found this technique of progressively increasing sound and Stimuli is not only more humane, it is more EFFECTIVE in breaking the barking habit than conventional shocking bark control collars. Anti Bark Collar can be adjusted to control the sensitivity of your dogs bark.

Putting the Collar on Your Dog:

Ensure that you have turned the collar off. Check the collar and adjust to the correct length, then screw on the correct size prongs, these prongs MUST be against your dog's skin to work, Short prongs for short haired dogs, long prongs for long haired dogs...If need be, shave

6

your dogs throat to get good contact, remember it is only for a short period of time. Place the collar around your dog's neck, it must not move, if it does then adjust and tighten the collar. Hold the unit and try to move it, when it does not move and you can slide just one finger under the collar that is now correctly fitted. prongs need to be either side of the windpipe. Now leave the collar on your dog, Do Not turn the collar back on.... Wait for 24 – 48 hours until your dog totally ignores the collar, initially they will scratch at it and just paw at it, when that completely stops we are ready to start the training. You must be present when you turn on the collar and start the training... Do not just leave your dog to figure it out, teach them from the start.

DO NOT UNDER ANY CIRCUMSTANCES PUT THE COLLAR ON YOUR DOG WITHOUT FIRST TESTING IT. Testing the Collar, No you do not have to bark at it... Just hold it up with the back of the collar facing you,

7

there is a small hole between the two prongs, just puff into the hole and the collar will beep. When you have selected Green, Just "puff" into the hole and check your results on page 4. For Blue just puff into the hole and the collar will beep and vibrate check you results on page 4. For Red You will need to use the test light. just puff into the hole and on the third beep place the test light on the two prongs and the test light will be illuminated, check you results on page 5. Now You have tested the collar take the sensitivity all the way down to number 1 by pressing the – button on the collar... If your dog barks and the collar does not beep, press the + button once this will increase the sensitivity to number 2, if your dog barks again and no beep, once again press the + button, continue this until the collar beeps immediately after your dogs bark. YOUR COLLAR IS NOW SET UP CORRECTLY Now we are going to start the Training, under no circumstances should you just put the collar

8

on your dog and leave it them to figure out, your dog will get confused and extremely upset. You MUST teach them what you expect from them. Remember every time your dog barks you give the command NO the collar will reinforce that command... If your dog continues to bark then you give a much more forceful NO and the collar will do the same, again continuation you give a much more forceful NO! Again the collar will mimic you... This way your dog will understand that the beep means no and the beep and vibration means NO! And the way to stop the discomfort is to stop barking....

DO NOT JUST PUT THE COLLAR ON YOUR DOG AND EXPECT THEM TO UNDERSTAND WHAT IT IS SUPPOSED TO MEAN, I WILL ADMIT SOME DOGS ARE SUPER S M A R T A N D W I L L U N D E R S T A N D A L M O S T IMMEDIATELY, BUT WHAT IF YOUR DOG DOESN'T UNDERSTAND, HELP THEM UNDERSTAND, TEACH THEM

9

ALWAYS ALWAYS REMOVE THE COLLAR WHEN YOUR DOG IS PLAYING ...

Please remember that this collar is a behavioral aid and you do not want to be telling your dog off while they are playing

Caution Notes:

1. Do not allow your dog to chew this collar. You should also attempt to minimize scratching or clawing at the casing.
2. This device is made up of plastic and electronic components that are not digestible. Consult your local vet if your dog swallows any part of this product.
3. The collar is not intended for use as a restraining collar. If you are using a leash, use it with a Separate restraining type of collar.

FAULT FINDING GUIDE

Q. The Collar Just Keeps Going Off. **A 1.** The sensitivity is set too high...you reduce the sensitivity by pressing the minus button. **A 2** The collar is not tight enough, please tighten the collar. **Q.** My Dog shakes his head and the

10

collar Goes Off. **A.** Because the collar feels unusual to your dog they will keep shaking their heads and scratching forcing the collar to activate... **Q.** My Dog Barks But the Collar Does Not Activate... **A.** Check the battery by performing a full test. If the collar tests correctly then you will need to either increase the sensitivity of the collar. Making it more sensitive + will make it activate easier. Or the collar is too loose, please tighten the collar. **Q.** Collar Will Beep but Will Not Vibrate **A.** There is enough charge in the battery to make it beep but not vibrate. Please recharge the battery. **Q.** The Collar Goes Off when my dog doesn't bark. **A.** The collar will sometimes give false alerts.... Do not worry about this your dog will learn very quickly that it is exactly that... a false alert. All dogs very quickly learn that the two beeps are exactly that, just two beeps, so they will bark. But you as a responsible dog owner want that, you want it so that they can talk... What the collar is designed to do is to STOP the excessive barking.
